

HNHSoft Talking Phrase Book Version 3.0 for Windows Mobile Smartphone Installation and Un-installation Guide

Before you start, please make sure you have the correct installation package for your device. If you are not certain about your device's operating system please email us at support@hnhsoft.com with your device make and model.

Installation

To install HNHSoft Talking Phrase Book, please follow the instructions below:

1. Download the setup package to your local desktop PC.

Download the installation package from

<http://www.hnhsoft.com/downloads>

Select your platform and find the product you want to download, click on the diskette icon, and save the file to your local desktop PC. Again, you must select a correct platform. Email us at support@hnhsoft.com if you are not certain how to select your mobile device's platform. If you do not have a program to open .zip file, please download it at <http://www.winzip.com>

2. Start ActiveSync

Connect your handheld device to your desktop PC via cable or cradle and let ActiveSync start. Wait until the ActiveSync green icon goes into steady state.

If you don't have ActiveSync installed, please download one from <http://www.microsoft.com/windowsmobile/activesync/default.mspx> and installed it before you begin to install our product on your device.

3. Remove previous version of HNHSoft Talking Phrase Book

If you have a copy of HNHSoft Talking Phrase Book installed, please un-install it. Please make sure you first exit the application before removing it.

On your handheld, go to Start → Settings → Remove programs, and remove the program.

4. Check free space

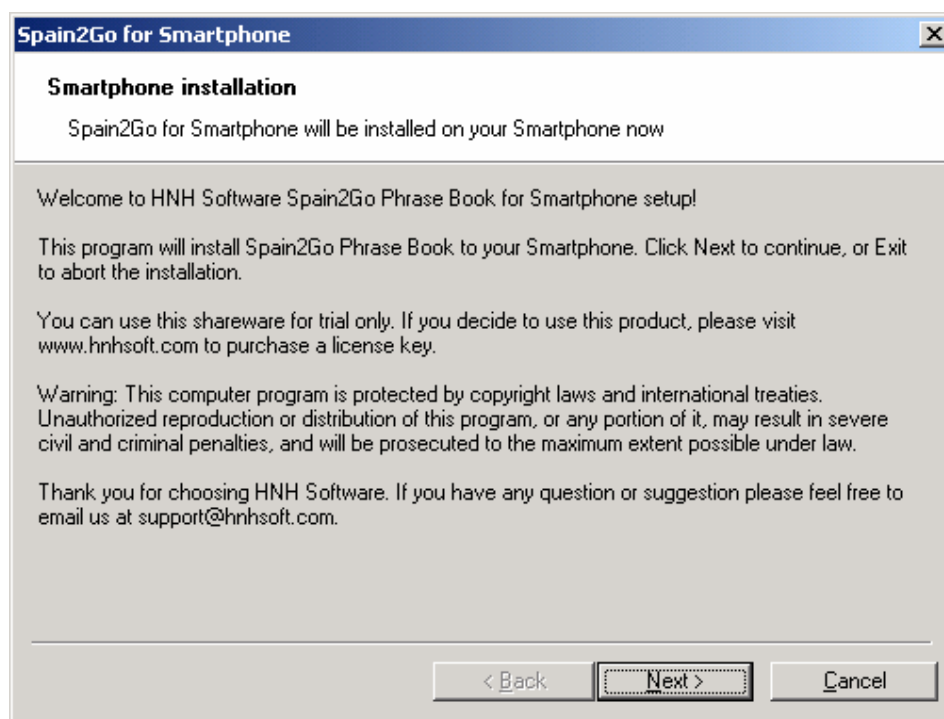

HNHSoft Talking Phrase Book requires at least 10MB free memory to install. Please make sure you have enough memory either in the internal memory or the external storage card.

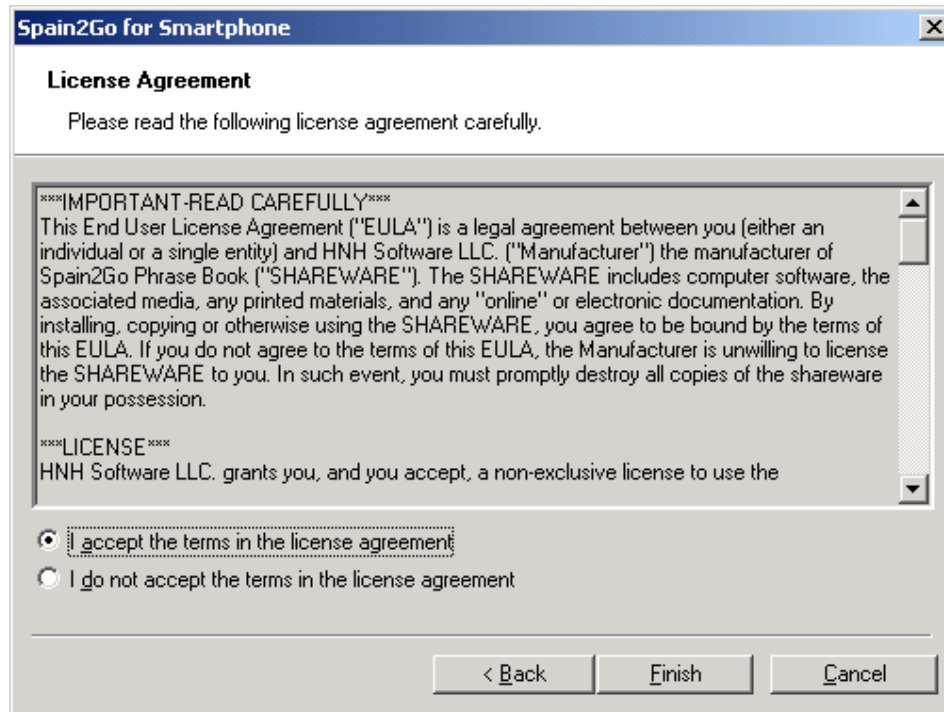

To check the free memory, on your handheld device go to Start → Settings → About.

5. Run Setup

On your desktop PC, double click the installation file (the file ending with .exe) to start the main setup program. Then follow on-screen instructions to proceed.

Please note the screen shots in this document are for Spain2Go Talking Phrase Book. Other languages are similar.

5. Choose installation location

You can install the application to either the internal memory or the external storage card. Simply make your choice when the installation program asks where you want to install the program.

6. Done!

You will now see the application icon on your Programs menu. You are all set to go.

Un-installation

To un-install the application, first please make sure you exit the application if it is still running.

After you have made sure the application is not running, from your Windows Mobile device, click Start → Settings → Remove programs, then select the application from the list.

If you have any question or comments, please email us at support@hnhsoft.com
